Program Effectiveness Data
The performance of the radiography program is reflected through the program effectiveness data; which is required information for the Joint Review Committee on Education in Radiologic Technology. Program effectiveness data includes the program completion rate, credentialing examination pass rate, and job placement rate. This information can also be obtained at www.jrcert.org/resources/program-effectiveness-data. Any questions pertaining to the program effectiveness data can also be directed to the Program Director.

The following information can be found in the radiography program's 2013 annual report to JRCERT:

Completion Rate: January 1 through December 31, 2013
This is an annual measurement of the number of students that began the program divided by the number of students that actually completed the program. The program's completion rate for 2013 was 29%. Six of the twenty-one students expected to complete the program in 2013 went on to complete it in that year.

Credentialing Examination Pass Rate: 2009 through 2013
This is the number of students that pass the American Registry of Radiologic Technologists (ARRT) certification examination on the first attempt within six months of graduation from the program. The figure reflects an average from the years 2009 through 2013 is 83.6%. Fifty-six of the sixty-seven graduates of this program taking the ARRT certification examination within six months of graduation passed on the first attempt.

Job Placement Rate: 2009 through 2013
This is the number of students that gain employment in the radiologic sciences within twelve months of graduation versus the number that graduate and are actively seeking employment. The figure reflects an average over a five-year period. The program's job placement rate as an average from the years 2009 through 2013 is 85%. Fifty-seven of the sixty-seven graduates obtained employment in the radiologic sciences within twelve months of graduation.
