This Bacone Advising Center form verifies a student's intent to change the major recorded in the official campus records. After you complete this form, an adviser will evaluate your transcript to determine your status under your new major. All students declaring a Health Sciences-related major should make an appointment to meet with a Health Sciences adviser as soon as possible. Late in the semester, the Registrar will not complete a major change until the student enrolls for the following term; this means that paperwork may continue to show the old major after this paperwork is processed.
